THE SITTING

HOW TO CUT

Sky-Sage finds the hour. The plate must be of the nature of the work. Venus on pewter is a mixed message. Jupiter on copper will not hold a fortune as pewter will.

- 1 Choose the disk. Copper for love and art. Pewter for substance and honour. Bronze for a name, a shop, visibility.
- 2 Open Sky-Sage. Sit in a fit hour of that planet, on its day if you can. Rank is a ranking, not a promise.
- 3 Light the taper before the hour. Frankincense on a coal you already have. Fumigate the plate three times.
- 4 Scribe the figure in one sitting. A name, if you use one, goes on the reverse — not through the image.
- 5 Fumigate three times after. Wrap in the linen. Do not show it about. The hour is closed.
